Students at one local college spent their spring break helping others instead of relaxing on a beach or hitting the slopes.

A group of West Virginia Wesleyan students used their time off to help victims of Hurricane Katrina in New Orleans. Throughout the week, they helped gut and rebuild homes which were damaged during the flooding. Some students say they would love the opportunity to take part in the alternative spring break again next year.

Sophomore Jillian Moga says the 18-hour drive was fun and worth the time.
